

Creating Bill of Materials (BOM's)

To create BOM's a few steps need to be followed:

1 - Items need to be defined if they are Finished Goods (made from a BOM) or if they are BOM Components. This is carried out under the Items Master list.

- Verify if you want to show "Hide_Zero_On_Hand".
- View each item and select the relevant checkbox to define if the item is Made from a BOM or is a BOM component. Both can be selected if your processes have multi-phase manufacturing.

Item Code	Description	On Hand (Sage)	On Hand	Qty Picked	From BOM	BOM Component
11032502	M003-250 Precure Tread	5.00	0.00	0.00	☐	☐
149553ZZ	Yellow stroller with green wheels	234.00	293.00	0.00	☒	☒
149554	Orange bicycle	177.00	144.00	0.00	☒	☐
152669	Silver ball with yellow dots	194.00	189.00	3.00	☒	☐
171226	Sport push chair	126.00	126.00	0.00	☒	☐

Once items are defined as Finished Goods or Components. Move on to the next step.

2) Setting up BOMs.

Define your BOM Code and description and select which Finished Goods item code this is to create. (Only items you selected as "From BOM" will be listed in the Finished Good Code selector.)
